	Examiner	Art Unit	
	Lucy P. Chien	2871	
The MAILING DATE of this communication appears on the cover sheet with the correspondence address Period for Reply			
A SHORTENED STATUTORY PERIOD FOR REPLY IS SET TO EXPIRE 3 MONTH(S) OR THIRTY (30) DAYS, WHICHEVER IS LONGER, FROM THE MAILING DATE OF THIS COMMUNICATION. - Extensions of time may be available under the provisions of 37 CFR 1.136(a). In no event, however, may a reply be timely filed after SIX (6) MONTHS from the mailing date of this communication. - If NO period for reply is specified above, the maximum statutory period will apply and will expire SIX (6) MONTHS from the mailing date of this communication. - Failure to reply within the set or extended period for reply will, by statute, cause the application to become ABANDONED (35 U.S.C. § 133). Any reply received by the Office later than three months after the mailing date of this communication, even if timely filed, may reduce any earned patent term adjustment. See 37 CFR 1.704(b).			
Status			
1) Responsive to communication(s) filed on _			
	This action is non-final.		
3) Since this application is in condition for allowance except for formal matters, prosecution as to the merits is			
closed in accordance with the practice under Ex parte Quayle, 1935 C.D. 11, 453 O.G. 213.			
Disposition of Claims			
4)⊠ Claim(s) <u>1-7</u> is/are pending in the application.			
4a) Of the above claim(s) is/are withdrawn from consideration.			
5) Claim(s) is/are allowed.			
6)⊠ Claim(s) <u>1-7</u> is/are rejected.			
7) Claim(s) is/are objected to.			
8) Claim(s) are subject to restriction and/or election requirement.			
Application Papers			
9) The specification is objected to by the Examiner.			
10)⊠ The drawing(s) filed on <u>05 July 2004</u> is/are: a)⊠ accepted or b)□ objected to by the Examiner.			
Applicant may not request that any objection to the drawing(s) be held in abeyance. See 37 CFR 1.85(a).			
Replacement drawing sheet(s) including the correction is required if the drawing(s) is objected to. See 37 CFR 1.121(d).			
11) The oath or declaration is objected to by the Examiner. Note the attached Office Action or form PTO-152.

DETAILED ACTION

Claim Rejections - 35 USC § 102

The following is a quotation of the appropriate paragraphs of 35 U.S.C. 102 that form the basis for the rejections under this section made in this Office action:

A person shall be entitled to a patent unless -

(e) the invention was described in (1) an application for patent, published under section 122(b), by another filed in the United States before the invention by the applicant for patent or (2) a patent granted on an application for patent by another filed in the United States before the invention by the applicant for patent, except that an international application filed under the treaty defined in section 351(a) shall have the effects for purposes of this subsection of an application filed in the United States only if the international application designated the United States and was published under Article 21(2) of such treaty in the English language.

Claim 1-3,5-7 are rejected under 35 U.S.C. 102(e) as being anticipated by Lien et al (US 6682786).

Regarding Claim 1,

Lien et al discloses (Fig. 1) An active component array substrate (13);

A pixel electrode layer (16), disposed over the active component array substrate (13); an opposite substrate (18), disposed opposite to the active component array substrate (13); A common electrode layer (17), disposed over the opposite substrate (18); Two inorganic alignment films (21,22), disposed over the pixel electrode layer (16) and the common electrode layer (17) respectively; and a negative dielectric anisotropic liquid crystal layer (23)(Column 6, Rows 50-62), disposed between the two inorganic alignments films (21,22), and aligned parallel to the inorganic alignment films.

Art Unit: 2871

Regarding Claim 2,

Lien discloses (Fig. 1) The active component array substrate comprises a thin film transistor (11) array substrate. (13)

Regarding Claim 3,

Lien discloses (Column 4, Row 27-30) The active component array substrate comprises a glass substrate which is a silicon substrate.

Regarding claim 5,

Lien discloses (Column 6, row 15-30) A material of the inorganic alignment film comprises silicon oxide.

Regarding Claim 6,

Lien discloses (Fig. 1) The opposite substrate (18) comprises a color filter substrate (25).

Regarding Claim 7,

Lien discloses (Column 4, Row 20-25) A material of the common electrode layer comprises indium tin oxide or indium zinc oxide.

Art Unit: 2871

Claim Rejections - 35 USC § 103

The following is a quotation of 35 U.S.C. 103(a) which forms the basis for all obviousness rejections set forth in this Office action:

(a) A patent may not be obtained though the invention is not identically disclosed or described as set forth in section 102 of this title, if the differences between the subject matter sought to be patented and the prior art are such that the subject matter as a whole would have been obvious at the time the invention was made to a person having ordinary skill in the art to which said subject matter pertains. Patentability shall not be negatived by the manner in which the invention was made.

Claim 4 is rejected under 35 U.S.C. 103(a) as being unpatentable over Lien et al (US 6682786) in view of Hachisu et al (US 2002/0113928).

Lien et al does not disclose the negative dielectric anisotropic liquid crystal layer comprises ferroelectric liquid crystal layer.

Hachisu et al discloses (Page 1, [0009]) the negative dielectric anisotropic liquid crystal layer comprises a chiral smectic C device, which is a ferroelectric liquid crystal layer. Its property is that it has a bistable memory nature and it undergoes inversion switching because of spontaneous polarization and thus demonstrates a very fast response speed thus providing excellent viewing angle characteristics.

It is obvious to one skilled in the art to modify Lien et al's display to include Hachisu et al's negative dielectric anisotropic liquid crystal layer comprising a chiral smectic C device's bistable memory nature that it undergoes inversion switching demonstrating a very fast response speed thus providing excellent viewing angle characteristics.

Conclusion

Any inquiry concerning this communication or earlier communications from the examiner should be directed to Lucy P. Chien whose telephone number is 571-272-8579. The examiner can normally be reached on M-F 8:30-5:00.

If attempts to reach the examiner by telephone are unsuccessful, the examiner's supervisor, Robert Kim can be reached on (571)272-2293. The fax phone number for the organization where this application or proceeding is assigned is 571-273-8300.

Information regarding the status of an application may be obtained from the Patent Application Information Retrieval (PAIR) system. Status information for published applications may be obtained from either Private PAIR or Public PAIR. Status information for unpublished applications is available through Private PAIR only. For more information about the PAIR system, see http://pair-direct.uspto.gov. Should you have questions on access to the Private PAIR system, contact the Electronic Business Center (EBC) at 866-217-9197 (toll-free).
